

PRIVATE TRANSPARENCY REPORT

2023

Sydinvest

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The private Transparency Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This private Transparency Report is an export of your responses to the PRI Reporting Framework during the 2023 reporting period. It includes all responses (public and private) to core and plus indicators.

In response to signatory feedback, the PRI has not summarised your responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options that you selected are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT (SLS)

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

The ambition of Sydinvest is to focus on sustainability as an embedded part of our business. We want to contribute to a positive development in society so that together we can ensure a sustainable future for the next generations. We have in our asset management department embarked on a journey towards a deeper integration of sustainability parameters in our investment processes. We truly believe that we can protect and enhance the long-term value of our investments, if we incorporate sustainability risks into the foundation of our investment processes. We have formulated a new and enhanced policy for responsible investment, and this policy will be our guiding principles in our work with sustainable investments in the coming years. We want to move away from an exclusion based ESG strategy towards an inclusion based strategy, where we actively select our investments based on a broad set of updated ESG data. We believe that this approach will benefit both the financial return on our investments and our ability to influence the companies that we invest in to embark on a journey towards a more sustainable business model.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Implementing the Disclosure Regulation in Prospectus and in the Annual Report took a large part of focus in 2022. Other than that targeted efforts were made to increase focus on the integration of ESG factors in our investment processes, as we hope that this will enable us to a greater extent to actively select an investment – not just to opt out. In 2022 the portfolio managers in Sydinvest received considerably greater access to independent ESG data and company ESG analysis from our external ESG partners. This data will help the portfolio managers to include ESG factors in their investment decisions to an even greater extent. We wish to be transparent around our ESG work, and we are committed to enhance our ESG related reporting to costumers.

As an example, we have worked on improving our internal systems to collect and report CO2 equivalent emissions on our investment portfolios in 2022. Our clients can now expect regular updates on CO2 emissions in our investment portfolios going forward. We have widened our range of products with ethical and ESG responsible profile in all relevant asset classes within several customer groups during 2022. This enhanced product offering means that an even larger proportion of our portfolio managers are working with ESG factors on a daily basis. In 2022 we monitored our entire investment portfolio regarding violations of international norms, and we have engaged in dialog with the companies that have shown severe violations of the norms. In 2022 we have been involved in 191 engagement cases.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In 2022 we continued the work towards a more integrated ESG investment approach. We are ambitious in our work with sustainable investments and we foresee great advances in the years to come. We want to incorporate ESG factors even deeper into our investment processes, and we want to enhance our capabilities as active owners. We are looking into how we can enhance our engagement work and the interaction with our voting processes. We also focus on the development of better internal investment processes that will allow us to invest in and support companies in their transition towards a more sustainable business model.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Steffen Ussing

Position

Chief Executive Officer

Organisation's Name

Sydivest

A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

(F) Fixed income - corporate	<input checked="" type="radio"/>	<input type="radio"/>
(G) Fixed income - securitised	<input type="radio"/>	<input checked="" type="radio"/>

ESG NOT INCORPORATED

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
OO 16	CORE	OO 11, OO 12–14	N/A	PUBLIC	ESG not incorporated	1

Describe why your organisation does not currently incorporate ESG factors into your investment decisions.

Internally managed
(G) Fixed income – securitised

We operate in a very narrow investment univers with only a handful of danish issuers. All the danish issuers are generally screening very well on ESG parameters. Due to the limited investment univners and lack of detailed ESG data on single securities within the "Fixed income - Securitised" asset class we have chosen not to incorporate any ESG factors in our investment process.

For your listed equity holdings, what escalation measures did your organisation, or the external investment managers or service providers acting on your behalf, use in the past three years?

(1) Listed equity

(A) Joining or broadening an existing collaborative engagement or creating a new one

(B) Filing, co-filing, and/or submitting a shareholder resolution or proposal

(C) Publicly engaging the entity, e.g. signing an open letter

(D) Voting against the re-election of one or more board directors

(E) Voting against the chair of the board of directors, or equivalent, e.g. lead independent director

(F) Divesting

(G) Litigation

(H) Other

(I) In the past three years, we did not use any of the above escalation measures for our listed equity holdings

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 37	CORE	Multiple, see guidance	N/A	PUBLIC	Stewardship: Escalation	2

For your corporate fixed income assets, what escalation measures did your organisation, or the external investment managers or service providers acting on your behalf, use in the past three years?

- (A) **Joining or broadening an existing collaborative engagement or creating a new one**
- (B) Publicly engaging the entity, e.g. signing an open letter
- (C) Not investing
- (D) Reducing exposure to the investee entity
- (E) **Divesting**
- (F) Litigation
- (G) Other
- (H) In the past three years, we did not use any of the above escalation measures for our corporate fixed income assets

STEWARDSHIP: ENGAGEMENT WITH POLICY MAKERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39	CORE	OO 8, OO 9	PGS 39.1, PGS 39.2	PUBLIC	Stewardship: Engagement with policy makers	2

Did your organisation, or the external investment managers or service providers acting on your behalf, engage with policy makers as part of your responsible investment approach during the reporting year?

- (A) Yes, we engaged with policy makers directly
 - (B) Yes, we engaged with policy makers through the leadership of or active participation in working groups or collaborative initiatives, including via the PRI
 - (C) Yes, we were members of, supported, or were in another way affiliated with third party organisations, including trade associations and non-profit organisations, that engage with policy makers, excluding the PRI
 - (D) **We did not engage with policy makers directly or indirectly during the reporting year beyond our membership in the PRI**
- Explain why: (Voluntary)

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

It is our assessment that greenhouse gas emissions are the problem associated with the largest single sustainability risk. Greenhouse gas emissions may have a potentially large negative impact on the value of our investments. Climate change driven by greenhouse gas emissions may contribute to more extreme weather which could affect companies' physical assets, eg production facilities. In addition companies with a high level of greenhouse gas emissions may be charged indirect taxes as regards these emissions or be outperformed by new technological solutions in the transition to a less emission-intensive global economy. This could have vast consequences for the earnings capacity of the individual company and therefore also our investment. As a result our efforts are targeted at reducing greenhouse gas emissions from our overall investment portfolio in order to minimise this sustainability risk and ensure the best risk-adjusted financial return for our customers

□

(B) Yes, beyond our standard planning horizon

(C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Sustainability risks are included in the investment decision process in line with financial risks because we believe that the most significant sustainability risks may have a substantial negative impact on the value of an investment. It is our assessment that greenhouse gas emissions are the problem associated with the largest single sustainability risk. As a result our efforts are targeted at reducing greenhouse gas emissions from our overall investment portfolio in order to minimise this sustainability risk and ensure the best risk-adjusted financial return for our customers. We apply exclusion-based investment strategies as well as investment strategies focusing on active ownership to mitigate the sustainability risk associated with greenhouse gas emissions.

(B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
- (B) Yes, using the One Earth Climate Model scenario
- (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
- (D) Yes, using other scenarios
- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

- (A) Yes, we have a process to identify and assess climate-related risks
 - (1) Describe your process

Sydinvest has established an overall investment process to ensure that investment decisions take into account the most significant sustainability risks. In order to identify sustainability risks in our investment decision process we use the concept of economic significance to ensure that we take into account the sustainability risks that may have the largest negative impact on the value of our investments. Our portfolio managers have access to sustainability analyses prepared by an external business partner. The analyses summarise the most significant sustainability risks in economic terms within environmental, social and governance issues, also known as ESG. An ESG score is assigned to companies according to their ability to tackle the most significant sustainability risks. The ESG score forms part of the overall investment decision process.

- (2) Describe how this process is integrated into your overall risk management

Sustainability risks are included in the investment decision process in line with financial risks because we believe that the most significant sustainability risks may have a substantial negative impact on the value of an investment.

- (B) Yes, we have a process to manage climate-related risks
- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
